JETRO has launched a video series „Succeed together in Japan and beyond“ which introduces foreign companies succeeding in the local Japanese business environment. CemeCon K.K. entered Aichi prefecture in January 2020 and has been selected by JETRO because of its successful establishment of its coating- and application center in central Nagoya. This video introduces Aichi and features interviews with local government officials, public organizations, universities, and corporations such as CemeCon K.K. As a German company we are proud to share our success story in JETRO's new promotional video.
